SUMMARY

Full Stack Web Developer with 2+ years of experience building and maintaining web applications using Laravel, PHP, MySQL, React.js, HTML, CSS, and JavaScript. Experienced in end-to-end development, including requirements analysis, database design, API development, frontend implementation, debugging, testing, and deployment. Currently gaining enterprise-level experience as a Software Developer Intern at PT Industri Kereta Api (INKA), working on internal applications, feature development, and application improvements. Strong in collaborating with designers and development teams using Figma and Git/GitLab. Seeking a Full Stack or Web Developer role to build reliable, scalable, and production-ready web applications.

EDUCATION

Pancasila University | S1 Informatics Engineering

Mar 2021–Feb 2026

GPA: 3.65/4.00

Institut Teknologi Sepuluh Nopember | D1 Information System

Sep 2019 – Sep 2020

GPA: 3.20/4.00

EXPERIENCE

Software Developer Internship – Digital Transformation

Aug 2026 – Present

PT. Industri Kereta Api (INKA)

- Analyzed, debugged, and resolved issues in a Laravel-based E-Office application.
- Improved correspondence, authentication, leave-date input, and document upload functionality.
- Performed application testing to ensure features worked according to user requirements.
- Researched and designed workflows for a new data synchronization feature.
- Developed frontend interfaces to support the Digital Transformation Division's internal needs.
- Managed code changes and collaborated on application development using GitLab.

Selected Projects:

- E-Office - Enhanced and maintained a Laravel-based internal E-Office application, including correspondence, authentication, leave management, and document upload functionality.
- Digital Transformation Short Link – Developed a web-based short link feature for the Digital Transformation Division, including frontend interfaces, workflow design, and multi-division link management.
- Data Synchronization Feature – Researched existing application workflows and developed frontend interfaces to support a new data synchronization feature.

Full Stack Programmer | Freelancer

Nov 2022 – Present

- Developed 5+ web-based applications using Laravel, PHP, MySQL, and React.js for clients in advertising, project management, sales, and travel.
- Managed full development lifecycle: requirements, database design, API implementation, front-end, deployment, and documentation.

Selected Projects:

- Travel Website – Built a travel booking site for a local business (Laravel + MySQL), including secure online transactions, product management, and payment gateway integration.
- Doctor Appointment Web – Contributed to React.js front-end and MongoDB API, designed UI in Figma, and wrote tests using Jasmine.

Final Projects | Pancasila University

Oct 2025 – Feb 2026

- Electronic Rental Management System - Built a full-stack rental management app (Laravel + MySQL) for electronic equipment, including inventory, booking, and payment tracking; deployed to production.

Full Stack Programmer Internship | PT. Batam Citra Mediatama

Oct 2024 – Jan 2025

- Built a Laravel-based project management web app to improve workflow and task tracking.
- Designed database structures for projects, tasks, users, and roles, and implemented auth & role-based access control.

Selected Projects:

- Project Management System – Internal tool for managing advertising projects, tasks, and assignments, deployed to live environment

Full Stack Programmer | Ghani Artha Clinic

Aug 2020 – Aug 2021

- Developed a web-based medical record system using Laravel to streamline patient data management.
- Designed database schemas for patient records, medical histories, prescriptions, and appointments.
- Implemented secure user authentication and role-based access control for staff and administrators.
- Deployed the system to a live server and provided technical documentation for users.

CERTIFICATION

IBM Front-End Professional Certificate | Coursera

December 31, 2023

Developing Front-End Apps with React | Coursera

December 14, 2023

Developing Cloud Native Application | Coursera

November 24, 2023

Web Development with HTML, CSS, JavaScript | Coursera

November 07, 2023

Dasar Pemrograman Web | Dicoding

Jul 2022 – Jul 2025

JavaScript | HackerRank

July 26, 2023

SKILLS

Front-End : HTML, CSS, JavaScript, React.js, Tailwind CSS

Back-End : PHP, Laravel, REST API, MySQL, Filament

Tools : Git, GitHub, VS Code, Postman, XAMPP, Figma

Soft Skills : Problem-solving, Collaboration, Communication
